

TRANSPONDER COVERS

TRACK & RAIL PRODUCTS

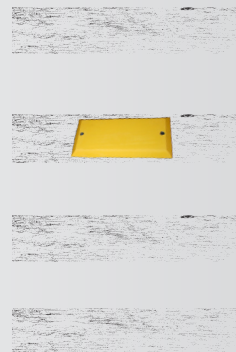

Safety-yellow transponder and AEI tag covers designed and manufactured at **Central Sales & Service, Inc.**

Placed in a series between track rails in rail yards, transponders control locomotives using remote radio transmitters. Left unprotected, these transponders are subject to damage from dangling brake lines and weather.

Central Sales & Service, Inc.'s transponder covers protect transponders from this damage, reducing the need for costly replacements.

- Constructed from durable, safety-yellow EPDM.
- Ozone/weather resistant - won't crack or chip.
- AEI Tag Covers also available.
